The quantum mind or quantum consciousness group of hypotheses propose that classical mechanics cannot explain consciousness. It posits that quantum mechanical phenomena, such as quantum entanglement and superposition, may play an important part in the brain's function and could contribute to form the basis of an explanation of consciousness.. Hypotheses have been proposed about ways for quantum ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Thank you for sharing this. I rather enjoy your theory " there's a kind of justice about it, while shamanism (for want of a better unifying term) would, I believe, serve civilisation better as a guiding philosophy / belief system than most of the grand motives that currently guide (particularly, Eurocentric) civilisation.
