In object-oriented programming, a God object is an object that knows too much or does too much. The God object is an example of an anti-pattern.. A common programming technique is to separate a large problem into several smaller problems (a divide and conquer strategy) and create solutions for each of them. Once the smaller problems are solved, the big problem as a whole has been solved.

God object - Wikipedia

In the English language, capitalization is used for names by which a god is known, including 'God'. Consequently, the capitalized form of god is not used for multiple gods or when used to refer to the generic idea of a deity. The English word God and its counterparts in other languages are normally used for any and all conceptions and, in spite of significant differences between religions, the ...
